Academic background

2017-2024
Mechanical engineering
UFPR - Universidade Federal do Paraná

Languages

C2 (Native)

C1 (Advanced)

B1 (Intermediate)

Skills

HTML

CSS

Bootstrap

Javascript

Programming logic

Excel

Solid Works

Experiences

Private math teacher

2017-currently (Freelancer)

Pedagogical accompaniment, elaboration of didactic material and another activities aiming the school reinforcement of middle and high school students.

Manufacturing engineering intern

Maio 2022-currently (Faurecia)

▪Budgeting of devices and equipment, making the price survey and the follow up with the suppliers
▪Translating of technical procedure manuals related to devices that are used in the manufacturing process of vehicles internal components.
▪Optimization and implementation of process that use weld as the main kind.

Manufacturing engineering intern

October,2021 - March,2022 (Oregon Tools)

▪Budgeting of devices and equipment, making the price survey and follow up with the suppliers
▪Optimization and elaboration of processes related to the manufacturing of chainsaws.
▪Registration of financial information related with the purchase of devices and equipment in the SAP system.
▪Support to the factory in the processes related to the manufacturing of chainsaws.

Project engineering intern

March 2020 - March 2021 (Tower parts)

▪Modelling, detailing and assembling of machines in solidworks.
▪Modelling, detailing and assembling of projects that were used in tests to assure the quality of the product in Solidworks.
▪Registration of engineering processes in the KORP system.
▪Registration of financial information of the devices, tools and parts that were purchased in the KORP system.

Project engineering intern

March 2019 - September 2019 (Isotron)

▪Modelling, detailing and elaboration of technical drawings of parts and assemblies using SolidWorks and inventor.
▪Technical follow up of Point weld machines manufacturing.
